Synthetic Metals, 61 (1993) 298–301

Subject Index of Volume 61

Aluminium
  conductivity measurements of $(GaPcF)_n$ and $(AlPcF)_n$ thin films: influence of gas exposure and structural disorder, 121

BEDT salts
  physical properties in the normal state of the molecular superconductor κ-$(BEDT)_2Cu_2(CN)_3$, 267
Bianthrones
  influence of substitution on the electronic properties of bianthrones, 177
Biosensors
  the application of conducting polymers in biosensors, 15
  conducting polymer-based amperometric enzyme electrodes. Towards the development of miniaturized reagentless biosensors, 31

Charge storage
  electrochemistry of end-capped oligothienyls. New insights into the polymerization mechanism and the charge storage, conduction and capacitive properties of polythiophene, 81
Chemical analysis
  chemical and electrochemical analyses of polyaniline prepared with $FeCl_3$, 239
Conduction
  electrochemistry of end-capped oligothienyls. New insights into the polymerization mechanism and the charge storage, conduction and capacitive properties of polythiophene, 81
Conductivity
  conductivity measurements of $(GaPcF)_n$ and $(AlPcF)_n$ thin films: influence of gas exposure and structural disorder, 121
  spectroscopy and conductivity of the separate *cis* and *trans* isomers of a PPV oligomer, 189
Copolymers
  evolution of the electronic properties of graded poly(thienylene vinylene)–poly(pyrrylene vinylene) mixed copolymers, 151
Copper
  physical properties in the normal state of the molecular superconductor κ-$(BEDT)_2Cu_2(CN)_3$, 267
Crystals
  structure, energy and charge transport in two-dimensional crystals of cyanine dyes, 91
  a new main-chain thermotropic liquid-crystalline polymer based on a substituted cyanostilbene: synthesis, thermo-optic observations and linear electro-optic effect measurements, 159
  electrical conductivity of a $Cs_2(TCNQ)_3$ single crystal measured at high pressures by a diamond anvil cell, 207
  quartz crystal microbalance characterization of electrochemical doping of polyaniline films, 291
$Cs_2(TCNQ)_3$
  electrical conductivity of a $Cs_2(TCNQ)_3$ single crystal measured at high pressures by a diamond anvil cell, 207

Cyanine dyes
  structure, energy and charge transport in two-dimensional crystals of cyanine dyes, 91
Cyanostilbene
  a new main-chain thermotropic liquid-crystalline polymer based on a substituted cyanostilbene: synthesis, thermo-optic observations and linear electro-optic effect measurements, 159

Design
  design, synthesis and assembly of new thiophene-based molecular functional units with controlled properties, 71
Diamond anvil cell
  electrical conductivity of a $Cs_2(TCNQ)_3$ single crystal measured at high pressures by a diamond anvil cell, 207
(2,5-Dimethyldicyanoquinonediimine)$_2$Cu
  resistance enhancement by magnetic field in the regime of the metal–insulator–metal re-entrance transition of the alloy of pristine and fully deuterated (2,5-dimethyldicyanoquinonediimine)$_2$Cu salts, 259
DMET-TSeF
  metallic and superconducting salts based on an unsymmetrical π-donor dimethyl(ethylenedithio)tetraselenafulvalene (DMET-TSeF), 199
Doping
  doped (conducting) and undoped (semi-insulating) LB films: application to gas sensing, 23
  doping effects in thin films of radical phthalocyanines: UPS and conductivity studies, 127
  doping and stability of ultrapure α-oligothiophene thin films, 147
  proton doping of reduced polypyrrole, 275
  quartz crystal microbalance characterization of electrochemical doping of polyaniline films, 291

Electrical conductivity
  electrical conductivity of a $Cs_2(TCNQ)_3$ single crystal measured at high pressures by a diamond anvil cell, 207
Electrical properties
  relationship between the structure and the electrical properties of lutetium bisphthalocyanine thin films, 133
Electrochemical analysis
  chemical and electrochemical analyses of polyaniline prepared with $FeCl_3$, 239
Electrochemical properties
  electrochemical properties of polydithienothiophene, 217
  synthesis and electrochemical property of organosilicon polymers containing π-electron conjugating system, 247
Electrochemistry
  electrochemistry of end-capped oligothienyls. New insights into the polymerization mechanism and the charge storage, conduction and capacitive properties of polythiophene, 81
Electrodes
  conducting polymer-based amperometric enzyme electrodes. Towards the development of miniaturized reagentless biosensors, 31

Electrodissolution
anodic electrosynthesis and cathodic electrodissolution of poly(2,5-di-(2-thienyl)pyrrole). A new way of processibility, 253
Electronic properties
evolution of the electronic properties of graded poly(thienylene vinylene)–poly(pyrrylene vinylene) mixed copolymers, 151
influence of substitution on the electronic properties of bianthrones, 177
Energy
structure, energy and charge transport in two-dimensional crystals of cyanine dyes, 91
Enzyme
conducting polymer-based amperometric enzyme electrodes. Towards the development of miniaturized reagentless biosensors, 31

$FeCl_3$
chemical and electrochemical analyses of polyaniline prepared with $FeCl_3$, 239
Fermi surface
the effects of open sections of the Fermi surface on the physical properties of 2D organic molecular metals, 63
Ferromagnetism
organic ferromagnetism in the nitronyl nitroxides *p*-NPNN and 3-QNNN: MUSR, EPR and a.c. susceptibility studies, 171
Films
doped (conducting) and undoped (semi-insulating) LB films: application to gas sensing, 23
modifications in the microscopic structure of Ru and Pb phthalocyanine films by intermolecular interactions, 115
conductivity measurements of $(GaPcF)_n$ and $(AlPcF)_n$ thin films: influence of gas exposure and structural disorder, 121
doping effects in thin films of radical phthalocyanines: UPS and conductivity studies, 127
relationship between the structure and the electrical properties of lutetium bisphthalocyanine thin films, 133
polymorphism of lithium phthalocyanine thin films, 139
orientation and mobility in ultrathin oligothiophene films: UV–Vis, IR and fluorescence studies, 143
doping and stability of ultrapure α-oligothiophene thin films, 147
ESR studies of polypyrrole films with a two-dimensional microstructure, 167
study of organic films by using total reflection of X-rays, 195
quartz crystal microbalance characterization of electrochemical doping of polyaniline films, 291
Fluorescence
orientation and mobility in ultrathin oligothiophene films: UV–Vis, IR and fluorescence studies, 143

Gallium
conductivity measurements of $(GaPcF)_n$ and $(AlPcF)_n$ thin films: influence of gas exposure and structural disorder, 121
Gas sensing
doped (conducting) and undoped (semi-insulating) LB films: application to gas sensing, 23

Insulator–conductor system
an all organic insulator–conductor system for microstructuration, 185
Isomers
spectroscopy and conductivity of the separate *cis* and *trans* isomers of a PPV oligomer, 189

LB films
doped (conducting) and undoped (semi-insulating) LB films: application to gas sensing, 23
LB structures
detailed structural investigations of highly aligned LB structures of thiophene derivatives, 97
Lead
modifications in the microscopic structure of Ru and Pb phthalocyanine films by intermolecular interactions, 115
Linear electro-optic effect
a new main-chain thermotropic liquid-crystalline polymer based on a substituted cyanostilbene: synthesis, thermo-optic observations and linear electro-optic effect measurements, 159
Lithium
polymorphism of lithium phthalocyanine thin films, 139
Local-field effects
resonance and local-field effects in the characterization of molecular monolayers by optical second-harmonic generation, 181
Low bandgap polymers
attempts to synthesize new low bandgap polymers, 163
Lutetium
relationship between the structure and the electrical properties of lutetium bisphthalocyanine thin films, 133

Magnetic field
resistance enhancement by magnetic field in the regime of the metal–insulator–metal re-entrance transition of the alloy of pristine and fully deuterated (2,5-dimethyl-dicyanoquinonediimine)$_2$Cu salts, 259
Metal–insulator–metal transition
resistance enhancement by magnetic field in the regime of the metal–insulator–metal re-entrance transition of the alloy of pristine and fully deuterated (2,5-dimethyl-dicyanoquinonediimine)$_2$Cu salts, 259
Microstructuration
an all organic insulator–conductor system for microstructuration, 185
Molecular monolayers
resonance and local-field effects in the characterization of molecular monolayers by optical second-harmonic generation, 181

Nitronyl nitroxides
organic ferromagnetism in the nitronyl nitroxides *p*-NPNN and 3-QNNN: MUSR, EPR and a.c. susceptibility studies, 171

Oligothiophene
orientation and mobility in ultrathin oligothiophene films: UV–Vis, IR and fluorescence studies, 143
doping and stability of ultrapure α-oligothiophene thin films, 147
Optical second-harmonic generation
resonance and local-field effects in the characterization of molecular monolayers by optical second-harmonic generation, 181
Organic molecular metals
the effects of open sections of the Fermi surface on the physical properties of 2D organic molecular metals, 63

Photochemical conversion
photochemical conversion of polyphenylenevinylene, 211
Photoconductors
polymeric photoconductors, 55
Phthalocyanines
modifications in the microscopic structure of Ru and Pb phthalocyanine films by intermolecular interactions, 115
conductivity measurements of $(GaPcF)_n$ and $(AlPcF)_n$ thin films: influence of gas exposure and structural disorder, 121
doping effects in thin films of radical phthalocyanines: UPS and conductivity studies, 127
relationship between the structure and the electrical properties of lutetium bisphthalocyanine thin films, 133
polymorphism of lithium phthalocyanine thin films, 139
Physical properties
the effects of open sections of the Fermi surface on the physical properties of 2D organic molecular metals, 63
physical properties in the normal state of the molecular superconductor κ-$(BEDT)_2Cu_2(CN)_3$, 267
Poly(2,5-di-(2-thienyl)pyrrole)
anodic electrosynthesis and cathodic electrodissolution of poly(2,5-di-(2-thienyl)pyrrole). A new way of processibility, 253
Poly(3-alkylthiophenes)
spectroscopic properties of poly(3-alkylthiophenes) and their 'head-to-head', 'tail-to-tail' coupled analogues poly(4,4′-dialkyl-2,2′-bithiophenes), 233
Poly(4,4′-dialkyl-2,2′-bithiophenes)
spectroscopic properties of poly(3-alkylthiophenes) and their 'head-to-head', 'tail-to-tail' coupled analogues poly(4,4′-dialkyl-2,2′-bithiophenes), 233
Polyacetylene
investigation of soliton dynamics in excited polyacetylene, 279
Polyaniline
polyaniline dispersions. 2. UV–Vis absorption spectra, 225
chemical and electrochemical analyses of polyaniline prepared with $FeCl_3$, 239
quartz crystal microbalance characterization of electrochemical doping of polyaniline films, 291
Polydicyanomethylene-cyclopenta-dithiophene and -dipyrrole
novel low bandgap polymers: polydicyanomethylene-cyclopenta-dithiophene and -dipyrrole, 103
Polydithienothiophene
electrochemical properties of polydithienothiophene, 217
Polymerization
electrochemistry of end-capped oligothienyls. New insights into the polymerization mechanism and the charge storage, conduction and capacitive properties of polythiophene, 81
Polymorphism
polymorphism of lithium phthalocyanine thin films, 139
Polyphenylenevinylene
spectroscopy and conductivity of the separate *cis* and *trans* isomers of a PPV oligomer, 189
photochemical conversion of polyphenylenevinylene, 211
Poly(phenylsilane)
VEH electronic band structure of poly(phenylsilane), 107
Polypyrrole
ESR studies of polypyrrole films with a two-dimensional microstructure, 167
proton doping of reduced polypyrrole, 275
Poly(pyrrylene vinylene)
evolution of the electronic properties of graded poly(thienylene vinylene)–poly(pyrrylene vinylene) mixed copolymers, 151
Poly(thienylene vinylene)
evolution of the electronic properties of graded poly(thienylene vinylene)–poly(pyrrylene vinylene) mixed copolymers, 151
Polythiophene
electrochemistry of end-capped oligothienyls. New insights into the polymerization mechanism and the charge storage, conduction and capacitive properties of polythiophene, 81
Pyrrole
novel low bandgap polymers: polydicyanomethylene-cyclopenta-dithiophene and -dipyrrole, 103

Resistance
resistance enhancement by magnetic field in the regime of the metal–insulator–metal re-entrance transition of the alloy of pristine and fully deuterated (2,5-dimethyl-dicyanoquinonediimine)$_2$Cu salts, 259
Resonance
resonance and local-field effects in the characterization of molecular monolayers by optical second-harmonic generation, 181
Ruthenium
modifications in the microscopic structure of Ru and Pb phthalocyanine films by intermolecular interactions, 115

Sensing
supramolecular structures and chemical sensing, 47
Sensors
functional polymers and supramolecular compounds for chemical sensors, 37
Silicon
VEH electronic structure of Si_{60}, 155
synthesis and electrochemical property of organosilicon polymers containing π-electron conjugating system, 247
Soliton dynamics
investigation of soliton dynamics in excited polyacetylene, 279
Spectra
polyaniline dispersions. 2. UV–Vis absorption spectra, 225
Spectroscopic properties
spectroscopic properties of poly(3-alkylthiophenes) and their 'head-to-head', 'tail-to-tail' coupled analogues poly(4,4′-dialkyl-2,2′-bithiophenes), 233
Spectroscopy
orientation and mobility in ultrathin oligothiophene films: UV–Vis, IR and fluorescence studies, 143
ESR studies of polypyrrole films with a two-dimensional microstructure, 167
spectroscopy and conductivity of the separate *cis* and *trans* isomers of a PPV oligomer, 189
Stability
doping and stability of ultrapure α-oligothiophene thin films, 147
Structural disorder
conductivity measurements of $(GaPcF)_n$ and $(AlPcF)_n$ thin films: influence of gas exposure and structural disorder, 121
Structural investigations
detailed structural investigations of highly aligned LB structures of thiophene derivatives, 97

Structures
supramolecular structures and chemical sensing, 47
structure, energy and charge transport in two-dimensional crystals of cyanine dyes, 91
VEH electronic band structure of poly(phenylsilane), 107
modifications in the microscopic structure of Ru and Pb phthalocyanine films by intermolecular interactions, 115
relationship between the structure and the electrical properties of lutetium bisphthalocyanine thin films, 133
VEH electronic structure of Si_{60}, 155
ESR studies of polypyrrole films with a two-dimensional microstructure, 167
Superconducting salts
metallic and superconducting salts based on an unsymmetrical π-donor dimethyl(ethylenedithio)tetraselenafulvalene (DMET-TSeF), 199
Superconductor
physical properties in the normal state of the molecular superconductor κ-$(BEDT)_2Cu_2(CN)_3$, 267
Supramolecular compounds
functional polymers and supramolecular compounds for chemical sensors, 37
Supramolecular engineering
supramolecular engineering at functionalized surfaces, 5
Supramolecular structures
supramolecular structures and chemical sensing, 47
Surfaces
supramolecular engineering at functionalized surfaces, 5
Susceptibility
organic ferromagnetism in the nitronyl nitroxides *p*-NPNN and 3-QNNN: MUSR, EPR and a.c. susceptibility studies, 171
Synthesis
design, synthesis and assembly of new thiophene-based molecular functional units with controlled properties, 71
a new main-chain thermotropic liquid-crystalline polymer based on a substituted cyanostilbene: synthesis, thermo-optic observations and linear electro-optic effect measurements, 159
attempts to synthesize new low bandgap polymers, 163
synthesis and electrochemical property of organosilicon polymers containing π-electron conjugating system, 247
anodic electrosynthesis and cathodic electrodissolution of poly(2,5-di-(2-thienyl)pyrrole). A new way of processibility, 253

Thermo-optic observations
a new main-chain thermotropic liquid-crystalline polymer based on a substituted cyanostilbene: synthesis, thermo-optic observations and linear electro-optic effect measurements, 159
Thiophene
design, synthesis and assembly of new thiophene-based molecular functional units with controlled properties, 71
detailed structural investigations of highly aligned LB structures of thiophene derivatives, 97
novel low bandgap polymers: polydicyanomethylene-cyclopenta-dithiophene and -dipyrrole, 103

VEH electronic structure
VEH electronic band structure of poly(phenylsilane), 107
VEH electronic structure of Si_{60}, 155

X-ray
study of organic films by using total reflection of X-rays, 195
